Product Description

The Tracker Certificate (the "Certificate") replicates the price movements in the Underlying (adjusted by the Units, the Management Fee, the Calculation Agent Fee any expenses and taxes, and, as the case may be, the FX Rate) and is therefore in terms of risk comparable to a direct investment in the Underlying. At the Redemption Date, the Investor will receive a Cash Settlement in the Settlement Currency, as further described under Redemption.

Index Description

The Underlying is a dynamic, actively managed index (the "**Index**") which is discretionarily managed by the Index Sponsor and calculated by the Index Calculation Agent. The components of the Underlying (the "**Components**") may – subject to Index Calculation Agent's veto right – be rebalanced by the Index Sponsor on a regular basis. The Index Sponsor determines and is responsible for the composition of the Index and may add, replace or remove Components in accordance with a set of predefined rules set out in the Index Rule Book "Luxury & Lifestyle Index", Version ID BT7LT, dated 20/08/2024 (the "**Index Rule Book**").

Objective: 50 representative underpinnings of the Luxury & Lifestyle theme. Within this theme are players whose activities are related to luxury goods, lifestyle, clothing, food, travel, etc.

Universe: The Index universe consists of eligible Components and may include Cash Instruments, Shares, as determined by the Index Sponsor and subject to the restrictions defined in the Index Rule Book.

Distributions: Net distributions with respect to Components (after deduction of any expenses and taxes) will lead to an adjustment of the Index (as specified in the Index Rule Book).

The Index represents a hypothetical portfolio. There is no obligation on the Index Calculation Agent, the Issuer or any other party to purchase and/or hold any Components of the Index and there is no actual portfolio of assets to which any person is entitled or in which any person has any ownership interest. The Index is merely comprised of Components, the performance of which will be used as a reference point for the purposes of calculating the value of the Index. The Issuer shall be free to choose how to invest or further proceed with any proceeds of the issuance of any of the Certificates.

* levels are expressed in percentage of the Initial Fixing Level

References to any rebalancing of the Index or addition, adjustment, substitution, replacement or removal of Components should not be construed as imposing an obligation on the Issuer, the Index Calculation Agent or any person actually to acquire or dispose of any securities, investments, assets or other property but are references to the change in, and relate solely to the calculation of, the value of the Index, which is relevant for the determination of any amount payable in respect of the Certificate.

Upon request, the Index Rule Book and the latest composition of the Index are available free of charge from the Lead Manager (Leonteq Securities AG, Europaallee 39, 8004 Zurich, Switzerland or termsheet@leonteq.com).

For the avoidance of doubt, the Rebalancing Fee does not apply to changes in Units _t in the Underlying. Redemption

The Investor is entitled to receive from the Issuer, subject to an Extraordinary Termination, on the Redemption Date per Product a Cash Settlement in the Settlement Currency corresponding to the value of the Underlying on the Final Fixing Date adjusted by the Units_t, the Management Fee, the Calculation Agent Fee and, as the case may be, the FX Rate. This amount equals Value_t on the Final Fixing Date, where Value_t is calculated according to the following formula and reasonably determined by the Calculation Agent.

$$\text{Value}_t = \text{FX Rate}_t \times \text{Units}_t \times \text{Index Value}_t - \text{AMF}_t - \text{ACAF}_t$$

Index Value _t	Means the official closing price of the Underlying on Scheduled Trading Day t as published by the Index Calculation Agent, and as reasonable determined by the Calculation Agent.
FX Rate _t	Means the prevailing exchange rate on the Scheduled Trading Day t as reasonably determined by the Calculation Agent. The exchange rate is expressed as units of the Settlement Currency per one unit of currency of the Underlying (if both currencies are identical then FX Rate _t is equal to 1.0).
Units _t	Means the notional units of the Underlying per Product on Scheduled Trading Day t. Provided Scheduled Trading Day t is not an Observation Date: Units_t = Units_{t-1} If Scheduled Trading Day t is an Observation Date: Units_t = Units_{t-1} - (AMF_t + ACAF_t) / (Index Value_t × FX Rate_t) Where Index Value _t means Index Value _t of the Underlying on Scheduled Trading Day t, adjusted by any costs incurred by the Issuer or a hedging party thereof for unwinding risk reducing hedging transactions relating to the Issuer's obligations under the Product, as reasonable determined by the Calculation Agent. Units _t are rounded in accordance with the Rounding Convention. Following the adjustment of Units _t by AMF _t , AMF _t is reset to zero. Following the adjustment of Units _t by ACAF _t , ACAF _t is reset to zero.
AMF _t	Means the accrued management fees on Scheduled Trading Day t and is determined by the Calculation Agent as follows: AMF_t = AMF_{t-1} + Value_{t-1} × MF × DayCount_t and AMF₀ = 0.00
ACAF _t	Means the accrued calculation agent fees on Scheduled Trading Day t and is determined by the Calculation Agent as follows: ACAF_t = ACAF_{t-1} + Value_{t-1} × CAF × DayCount_t and ACAF₀ = 0.00
Day Count _t	Means the actual number of calendar days between (and including) Scheduled Trading Day t-1 to (and excluding) the current Scheduled Trading Day t divided by 360.
Rounding Convention	Numbers are rounded down to five (5) decimal places.
Scheduled Trading Day t	Means any calendar day on which the Index Calculation Agent is scheduled to publish a value for the Underlying. The Initial Fixing Date corresponds to Scheduled Trading Day 0 and for any subsequent Scheduled Trading Day variable t is incremented by one (1.0).
Initial Fixing Level (Index Value ₀)	Means the official closing price of the Underlying on the Initial Fixing Date as determined by the Calculation Agent.
Extraordinary Termination	The Issuer has the right to call all Certificates with immediate effect, without prior notice (the " Extraordinary Termination "). Such Extraordinary Termination will prevail any Investor's Termination Right and/or Issuer's Termination Right, if applicable.

The Issuer may exercise its right for Extraordinary Termination:

- a. based on Hedging Disruption and other provisions as set out in paragraph "Termination and Cancellation due to Illegality, Impracticality, Illiquidity, Impossibility, Increased Cost of

Hedging, Hedging Disruption, Increased Cost of Collateralisation (TCM Products and ETPs), Changed Secured Financing Ability, Negative Value or Materially Increased Other Costs" of the Programme; or
 b. if the agreement, or any part thereof concerning the Index, between the Index Sponsor and the Issuer and/or the Index Calculation Agent (or an affiliate thereof) is terminated; or
 c. if the Index in whole or the calculation of the index value are terminated, as the case may be.

In case of an Extraordinary Termination the Issuer will pay to the Investor a Cash Settlement in the Settlement Currency that shall be the fair market value of the Product, taking into account the event that led to the Extraordinary Termination, less any costs and withholdings levied onto the Issuer and/or any of its affiliates for unwinding its hedge positions, all as determined by the Calculation Agent in its sole discretion. Such amount shall be paid to the Investor 5 Business Days following completion and receipt in full of the proceeds for all disinvestments in all relevant hedge positions, as reasonably determined by the Calculation Agent in its sole discretion.

Issuer's Termination Right	The Issuer has the right to call all Certificates for early redemption (the " Termination Right ") at any time with a 15 Business Days (prior to the respective Final Fixing Date) notice by announcement (the " Termination Announcement ") on the Lead Manager's website, all in accordance with the General Terms and Conditions of the Programme. The Termination Announcement will specify the Final Fixing Date and the respective Redemption Date. Following the announcement, the Certificates will be redeemed on the Redemption Date for a value equal to the Value _t on the Final Fixing Date as determined by the Calculation Agent.
Investor's Termination Right	Each Investor has an annual right, on 20/08 and for the first time on 20/08/2025, to call the Certificates for redemption (such day the Investor's Termination Right becomes effective being the Final Fixing Date, as defined herein) by delivering a duly completed and signed Redemption Notice to the Paying Agent in accordance with the General Terms and Conditions of the Programme (the Redemption Notice to be received by the Paying Agent no later than 12:00 am CET on the 15th Business Day preceding the respective Final Fixing Date). Thereafter, the Certificates will be redeemed on the Redemption Date for a value equal to the Value _t on the Final Fixing Date as determined by the Calculation Agent.

This is a structured product involving derivative components. Investors should make sure that their advisors have verified that this Product is suitable for their portfolio taking into account the investor's financial situation, investment experience and investment objectives.

The terms and conditions of the Product may be subject to adjustments during the lifetime of the Product as set out in the Programme.

Product Specific Risks: Unless this Product is capital protected, investors may lose some or all of their investment as well as the transaction costs as they are fully exposed to the performance of the Underlyings. Market risk is the risk associated with the effect of changes in market factors such as interest and foreign exchange rates, equity and commodity prices, credit spreads or implied volatilities, on the value of assets and liabilities held for both the short and long term. Market risk may also lead to an early redemption of the Product (e.g. in the event of a hedging disruption).

Market Risks

The general market performance of securities is dependent, in particular, on the development of the capital markets which, for their part, are influenced by the general global economic situation as well as by the economic and political framework

conditions in the respective countries (so-called market risk). Changes to market prices such as interest rates, commodity prices or corresponding volatilities may have a negative effect on the valuation of the Underlying(s) or the Product. There is also the risk of market disruptions (such as trading or stock market interruptions or discontinuation of trading) or other unforeseeable occurrences concerning the respective Underlyings and/or their stock exchanges or markets taking place during the term or upon maturity of the Products. Such occurrences can have an effect on the time of redemption and/or on the value of the Products.

In special market situations, where the Issuer and/or the Lead Manager is/are unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices may be temporarily expanded, in order to limit the economic risks of the Issuer and/or the Lead Manager.

Additional Information and Risk Factors Related to Products linked to a Reference Asset denominated in Renminbi and Renminbi-Denominated Products.

For the purpose of this Termsheet and where the context requires, "Renminbi" or "CNY" refers to the lawful currency of the People's Republic of China ("PRC"). "CNY" is the official (ISO) code on the currency markets. CNY is not available and not tradable outside of the PRC. Therefore "CNH" has been established as offshore deliverable CNY. CNH is not an official ISO code and is only used as a technical term for differentiation between the currency used/traded in the PRC (CNY) and the respective offshore tradable and deliverable currency (CNH).

Renminbi is subject to PRC exchange control policies and there is limited availability of Renminbi outside the PRC. Renminbi is not freely convertible and is subject to exchange control policies and restrictions of the PRC government. As a result of restrictions imposed by the PRC government on cross-border Renminbi fund flows, the availability of Renminbi outside the PRC is limited, which may adversely affect the liquidity of Renminbi outside the PRC, which in turn may adversely affect the market value, and the potential return, of the Product.

Risks relating to Renminbi exchange rate and interest rate

The Product will be denominated and settled in Renminbi outside the PRC. The exchange rate of, and interest rate for, Renminbi outside the PRC may be different from the same in the PRC. The value of Renminbi against Hong Kong dollar and other foreign currencies fluctuates and is affected by changes in the PRC and international political, economic and market conditions and by many other factors. There is no guarantee that Renminbi will not depreciate and any devaluation of Renminbi could adversely affect the market value of the Product. In addition, interest rates for Renminbi in the PRC are government controlled. The PRC government may further liberalise the regulation of interest rates for Renminbi in the PRC which may increase interest rate volatility for Renminbi outside the PRC. Any fluctuation in interest rates for Renminbi outside the PRC may adversely affect the market value, and the potential return, of the Product.

Renminbi payment risk

If the Settlement Currency of the Product is Renminbi, and a FX Disruption Event has occurred and is continuing on, a scheduled date of payment, payment may be made in Successor Currency on the postponed payment date. In such case, there may be a delay in payments under the Product and no interest will be payable for any such delay. Investors may also suffer a loss in the Successor Currency if Renminbi depreciates against the Successor Currency following the occurrence of a FX Disruption Event.

China Connect risk

If the Underlying(s) or Underlying Component(s) are eligible securities listed and traded on the SSE and SZSE ("China Connect Securities") (as in the case of A-Shares as Underlying), foreign investors may invest in such China Connect Securities through China Connect. The respective Hedging Entity may (but is not obliged to) choose to hedge obligations under the Products using China Connect.

Trading through China Connect is subject to a number of restrictions which may restrict or affect an investment in China Connect Securities, including (but not restricted to) the application of PRC law and regulation to investors in China Connect Securities, pre-trade checking to prevent naked short-selling, the application of aggregate and daily RMB quotas and restrictions on the ability of an investor to take up certain types of rights issuances through China Connect. In particular, it should be noted that China Connect is in its initial stages. Further developments are likely and there is no assurance as to whether or how such developments may restrict or affect an investment in China Connect Securities. In addition, the laws and regulations

of Hong Kong and the PRC, and the rules, policies or guidelines published or applied by any regulator which regulates China Connect and activities relating to China Connect (including without limitation, the China Securities Regulatory Commission (CSRS), People's Bank of China (PBOC), State Administration of Foreign Exchange (SAFE), Securities and Futures Commission (SFC), Hong Kong Monetary Authority (HKMA) or any other regulator, agency or authority with jurisdiction, authority or responsibility in respect of China Connect), or any exchange, clearing system or other entity which provides services relating to China Connect (including without limitation, the Stock Exchange of Hong Kong (SEHK) and any relevant subsidiary, Hong Kong Securities Clearing Company (HKSCC), Shanghai Stock Exchange (SSE), Shenzhen Stock Exchange (SZSE) or China Securities Depository and Clearing Corporation (CSDCC) from time to time in respect of China Connect or any activities arising from China Connect are new and subject to change, and there may be uncertainty as to their interpretation and/or implementation.

These potential restrictions and uncertainties relating to China Connect may trigger a Hedging Disruption, a Market Disruption Event or an Additional Disruption Event. Even if trading on the SSE or SZSE continues uninterrupted, such events concerning China Connect could lead to adjustments to the terms of the Products or to their redemption earlier, or later, than scheduled. Such uncertainty and any potential change of the laws and regulations in the PRC for the China Connect may adversely impact on the performance of the Underlying and may also have a potential retrospective effect. These changes may in turn adversely affect the market value of the Product, which may result in a partial or total loss of the invested capital.

Risks of investing in the PRC securities market and derivative instruments relating to it

The PRC capital market is still at a premature stage. Regulation of the PRC capital market is heavily influenced by government policies and is less transparent and less efficient than the regulation of developed capital markets. There still remain allegations and convictions of malpractices such as market manipulation and insider trading. The stock price of a PRC listed company may not therefore reasonably reflect its intrinsic value. In addition, the disclosure of information by a PRC company with respect to its financial status may not always be complete and reliable. If the stock price of a PRC listed company does not reasonably reflect its intrinsic value, such pricing inaccuracy will be passed through to derivative instruments such as the Products.

Investment in the PRC securities markets (which are inherently stock markets with restricted access) involves certain risks and special considerations as compared with investment in more developed economies or markets, such as greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
